EAST CORINTH

Pitiable Conditions at the Asher White Home—Mrs. White Died, Neighbors Fed Stock.

Mrs. Asher L. White passed away at the home of her father, E. H. Everett, early Monday morning, after about a week's illness from bronchial pneumonia, following influenza. Mr. White and two of the children and the hired man were all sick at one time, and as there was no one to care for them, Mr. Everett took Mrs. White and the three children home, when the pneumonia developed. Beside her husband, she leaves three children, Guy, Katherine and Louis, and her father and mother and a brother, Leland Everett. She was 34 years old. The funeral was held Wednesday afternoon at 1 o'clock, with burial in the new cemetery beside the baby daughter who died about two years ago.

As there was no one to care for the stock at Mr. White's, the neighbors went in on snowshoes Sunday, carrying hay and grain on their backs, and on Monday E. M. Bowen took his men from the shop and shoveled a road to them. One horse died and the rest of the stock was got out Monday and Tuesday.

Winfield Darling is very sick with double pneumonia. Mrs. Henry Hood of Topsham is helping care for him. Mrs. Orin Dodge, who has been spending a week with her son in Fairlee, has returned.

Kenneth Batten took the mail to Bradford Saturday, but was unable to get back either that day or Sunday, and on Monday it took him four hours to get the four miles from East Corinth to Waits River and on Tuesday he did not try to get through, but Postmaster Worthley took the mail to Bradford and brought the mail back, so from Friday to Wednesday we had two mails.

The oldest inhabitants can remember few storms equal to that of Saturday and Sunday.

C. W. Jewell was in Piermont on Wednesday and Thursday.

NORTH FAYSTON

The sad news was received Wednesday of the death of Allen Howe of Waitsfield. Mr. Howe was formerly a resident of this town for years before going to Waitsfield to live with his daughter, Mrs. C. J. Green. His remains were brought here Thursday and placed in the North Fayston cemetery.

A lively runaway was witnessed on Wednesday, which caused considerable excitement, a pair of horses owned and driven by Mr. Buck, manager of the Green Mountain Lumber company. Mr. Buck was coming into town and in some way a bolt came off and Mr. Buck and part of his traverse sleigh were left behind, while the horses took a spin along the road for two miles or more before they were caught, as the men all happened to be away at work. No harm was done to driver, horses or sleigh.

While working in the woods Tuesday for the Green Mountain company, Mr. Stone of Montpelier got hit in the head and face by a binder flying back from a load of logs. He was quite badly hurt and it was thought at first that his jaw was broken, but on examination it was found not to be as bad as it appeared. Mr. Stone had some teeth loosened.

The mail carrier was able to go his full round Wednesday over the Center for the first time since Friday. The blizzard was the worst that has been known for years.

It is rumored that A. L. Boyce has sold his farm to a party from New Mexico. Percy Corlies carried on the place last year and had made plans to stay another year.

L. J. Nelson and Dennis Griffin went to Montpelier Tuesday, returning home next day.

F. L. Baton of Middlesex was in town Wednesday on business.

John Mobus of Warren was in town one day last week on business.

Mrs. Hugh Henry is on the gain after a week's illness.

Raymond Little is recovering from an attack of pneumonia.

"SAVE MONEY ON MEAT" WEEK

Has Been Designated by Department of Justice Week of March 22

CHEAPER MEATS WILL BE BOUGHT

Fair Price Commissioners Are Conferring With Retail Dealers

Washington, D. C., March 12.—The week of March 22 was set by the department of justice to-day as the first "save money on meat" week. Fair price commissioners in many states have been holding conferences with retail meat dealers as a result of which the cheaper cuts of meat will be stocked to meet the expected demand.

TREASURY DEPT. NOT FOR MORE BONDS

Further Issues Would Carry All Securities Lower in Market Values, Says Sec. Houston.

Washington, March 12.—The treasury department has not approved former Secretary McAdoo's plan of reducing taxes by means of additional bond issues. Secretary Houston yesterday told the House ways and means committee in reply to a question by Representative Fear, Republican, Wisconsin.

European countries made mistakes when they endeavored to meet war expenditures by constant loans.

"They haven't balanced budgets by increased taxes," said Mr. Houston. "To adopt such a policy in this country would put us in a position similar to the European countries. Government obligations can be issued until they are not worth the paper on which they are printed."

"Has the issuance of treasury certificates increased living costs?" Mr. Fear asked.

"That is a broad field you are entering, but we must retrace our steps to bring down costs," Secretary Houston replied.

Immediate decrease in taxes is impossible, the secretary told the committee in answer to a question by Chairman Fordney. He added that in view of economies by Congress, the financial situation could be successfully handled this year under existing laws.

"If we issue further bonds it will carry all securities lower in their market values," he continued.

"How great a depression would result?" asked Representative Garner, Democrat, Texas.

"It might force the best securities as low as 90 and the others down to 60," the secretary replied.

A HERMIT REPUBLIC.

Liberia Has No Roads, No Railways, No Telegraphs, No Steamboats.

London, March 12.—Liberia is truly a hermit republic, writes Alan Boucher, a Londoner, author and traveler, in the Daily Telegraph. The country, he adds, has no roads, no railways, no telegraphs, no steamboats on its rivers nor any practical exploitation of her wealth.

Liberia, in Monrovia, the capital, virtually do not exist with the exception of one place which is conducted by the mayor. This man is an enterprising negro of North Carolina, who besides attending to the duties of the mayor, also conducts his hotel, operates an ice plant and an ice cream parlor which formerly was German property. From these latter his profits are said to be gigantic. He also has "something to do with the postoffice" and is a police constable.

"In fact," says Mr. Lethbridge, "this remarkable man, starting from nothing, has made himself a Rockefeller of Liberia."

In Monrovia, says the traveler, there are no horses, motels, rickshaws or other wheel vehicles; no street lighting, no drinking water and not infrequently food supplies for the European colony run out and strict rationing is enforced until the ship arrives.

Unless the 23 members of Congress appear at parliament houses properly attired in a black frock coat, patent leather shoes, white waist coat and top hat, they are liable to a fine of \$5. The thermometer sometimes registers 110 in the shade.

MEMORIAL TO AIR HEROES.

Room in Clubhouse in New York Set Aside in Honor of 10 Men.

New York, March 12.—The first memorial here to American fighting aviators killed in France is a room in the clubhouse of the American Flying club set aside in honor of 10 aviators of the 22nd pursuit squadron of the American expeditionary force. A tablet in the room bears the names of the following aviators who were killed in action: First Lieutenants Philip E. Hassinger, Arthur C. Kimber, Henry B. Hudson, John G. Agar, Jr., James B. Biggs, James D. Beane, Remington D. K. Verneam, and Howard R. Clapp, and Second Lieutenants Vaughn R. McCormick and Edward B. Gibson, Jr. Members of other squadrons are planning to dedicate similar rooms at the club building in honor of comrades killed in action.

YANKEE INGENUITY TRIUMPHS.

Oil-Burning Steamer Is Converted Into a Coal Burner.

Philadelphia, March 12.—Yankee ingenuity has triumphed in far off Belgium. The American steamer Ogontz, built at Hog Island last May as an oil burner, ran short of fuel at Matadi. Captain H. Kerr managed in 21 hours to convert her into a coal burner. After discharging its cargo, the Ogontz steamed nearly 1,000 miles to Las Palmas Island and obtained a supply of fuel oil. She was recovered into an oil burner there and returned to New York.

Beyond Worry.

"Barker boasts that he can trace his ancestors back to the Pilgrims." "Well, the Pilgrims are dead and they won't," said H. C. Boston Transcript.

GIRLS! DRAW A MOIST CLOTH THROUGH HAIR

Let "Danderine" save your hair and double its beauty

Oh, girls, such an abundance of thick, heavy, invigorated hair; a perfect mass of wavy, silky hair, gloriously fluffy, bright and so easy to manage. Just moisten a cloth with a little "Danderine" and carefully draw it through your hair, taking one small strand at a time; this magically removes all dirt, excess oil and grease, but your hair is not left brittle, dry, stringy or faded, but charmingly soft, with glossy, golden gleams and tender tints and color are again in your hair. "Danderine" is a tonic-beautifier. Besides doubling the beauty of the hair at once, it checks dandruff and stops falling hair. Get delightful Danderine for a few cents at any drug or toilet counter and use it as a dressing and invigorator as told on bottle.—Adv.

FRECKLES

March Brings Out Unsightly Spots—How to Remove Easily.

The woman with tender skin dreads March because it is likely to cover her face with ugly freckles. No matter how thick her veil, the sun and winds have a strong tendency to make her freckle.

Fortunately for her peace of mind, Othine—double strength, makes it possible for even those most susceptible to freckles to keep their skin clear and white. No matter how stubborn, once you have the double strength Othine should remove them.

Get an ounce from your druggist and banish the freckles. Money back if it fails.—Adv.

STEAMSHIP TYEE RESCUED.

Disabled and Short of Provisions 100 Miles at Sea.

New York, March 12.—Rescue of the steamship Tyee, disabled and short of provisions 100 miles east of Ambrose channel, was reported yesterday in a wireless message from the steamship Lake Markham. The message said the Lake Markham has the Tyee in tow and was headed for the Delaware breakwater.

The Lake Markham was on her way from Cuba to Boston with a cargo of sugar. The Tyee was bound to New York from the Azores.

Make that skin trouble vanish

Don't be a martyr to eczema or any such itching, burning skin affliction any longer. Put an end to the suffering with Resinol Ointment. In most cases it gives instant relief and quickly clears the eruption away.

Resinol

All druggists sell Resinol Ointment. For sample free, write to Dept. L. E. Resinol, Baltimore, Md.

BOSTON PEOPLE WERE DROWNED

Joshua Seaver and Mrs. Rosa Crocker Were Bathing at Miami, Fla.

FIRST REPORT NAMED MRS. SEAVER VICTIM

But, According to the Police, It Was Mrs. Crocker, Instead

Miami, Fla., March 12.—The police stated last night that the woman drowned yesterday with Joshua Seaver, Boston glue manufacturer, while in swimming here, was not his wife, as had been reported.

According to the police here, the body has been identified as that of Mrs. Rosa Crocker of Boston.

AMERICA'S TROUBLE ONLY BEGINNING

Declared W. T. Griffiths, Returning to England from Trip to United States.

London, March 12.—"America's industrial troubles are only beginning," said W. T. Griffiths, of the Iron and Steel Trades Confederation, who has just returned from a trip to America, to a news agency interviewer.

"I have been most impressed with the dire lack of machinery in America for settling industrial disputes, especially in the iron and steel trade," he went on. "In that respect we are years ahead of America." Mr. Griffiths added that he found general chaos in every industry.

Fear of American competition, he continued, was more fictitious than real, and he was thoroughly convinced that England had a wonderful opportunity for recovering its former position in the foreign markets.

"In one thing America excels," Mr. Griffiths concluded. "The output of their steel mills would be almost incredible to the average British iron and steel worker."

HELPING WOMEN WORKERS. Who are Meeting with Difficulties in England.

London, March 12.—Women who are out of work or whose earning capacities have suffered as a result of the war are now the beneficiaries of the direct help and advice of the central committee on women's training and employment, which has just been appointed by the minister of labor as a standing committee. The new committee has been empowered to take over the work of the women's "work for women" fund and a further sum of £200,000 has been allocated to it by the national relief fund.

The new committee, which consists of fourteen members, all well known social workers under the chairmanship of the marchioness of Crewe, will be at once to train eligible women to qualify as teachers of domestic science, higher grade cookery, physical science and welfare work, and a selected few will be introduced to the medical and legal professions.

PROTECTION AGAINST "BORER." Is Being Tried by the United States Government.

Washington, D. C., March 12.—The enormous value of corn, the premier crop of the nation, has made it necessary for the government to take all possible precaution to prevent further infestation from the European "corn borer," which is supposed to have entered the country in shipments of broom corn and has obtained a limited foothold in the eastern part of the country.

Large sums are being spent in an effort to control it and a ruling soon is expected from the federal horticultural board as to whether a quarantine shall be imposed against the foreign corn stalks and ears of Indian corn, broom corn and other plants that may bring the borers. It would not apply to shelled corn or to the thrashed seeds of the other plants.

UNITED STATES BLAMED For Troubles Being Experienced in Turkey.

London, March 12.—Blame for the troubles that are being experienced in settling the Turkish problem were laid at the door of the United States by Earl Curzon, the foreign secretary, in explaining the peace conference's negotiations to the House of Lords yesterday.

BOYS HELPED TO SAVE GAME.

By Digging a Way Through Snow Drifts to Game Preserve.

Harrisburg, Pa., March 12.—Eighty-six boys in the schools of Lykens, Pa., saved the game in the Lykens game preserve in the upper end of Dauphin county by helping to get food to them during the recent heavy snow. They volunteered to shovel snow from the road into the woodland where herds of deer and numbers of grouse pheasants and quail, recently placed there by the Pennsylvania game commission, were in danger of starving. Though snow drifts three or four feet high were piled in the roads the boys in one afternoon cut a path through them and enabled the keeper to save valuable game.

DYES HER GARMENTS BUT NONE CAN TELL

"Diamond Dyes" Turn Faded, Shabby Apparel into New

Don't worry about perfect results. Use "Diamond Dyes," guaranteed to give a new, rich, fadeless color to any fabric, whether it be wool, silk, linen, cotton or mixed goods.—dresses, blouses, stockings, skirts, children's coats, feathers, draperies, coverings. The Direction Book with each package tells so plainly how to diamond dye over any color that you cannot make a mistake. To match any material, have druggist show you "Diamond Dyes" Color Card.—Adv.

Born in 1839 Dr. Caldwell Still in His Office Daily

Wonderful vigor of the founder of Dr. Caldwell's Syrup Pepsin. Millions now use his famous prescription

Physicians know that good health depends largely upon proper digestion and elimination and that much sickness results from constipation. No one knows this better than the "family" doctor, the general practitioner.

Dr. W. B. Caldwell of Monticello, Illinois, was and is a family doctor. The whole human body, not any small part of it, was his practice. More than half his "calls" were on women, children and babies. They are the ones most often sick. But their illnesses were usually of a minor nature—colds, fevers, headaches, biliousness—and all of them required first a thorough evacuation. They were constipated.

Dr. Caldwell in the course of 40 years' practice, for he was graduated from Rush Medical College back in 1875, had found a good deal of success in such cases with a prescription of his own containing simple laxative herbs with pepsin. In 1892 he decided to use this formula in the manufacture of a medicine to be known as Dr. Caldwell's Syrup Pepsin, and in that year the preparation was first placed on the market. The picture of Dr. Caldwell that appears on the package was taken in that year.

The preparation immediately had as great a success as the drug stores as it previously had in the doctor's private practice. Today the third generation is using it.

Mothers are giving it to their children who were given it by their mothers. Every second of the working day someone somewhere is going into a drug store to buy it, for Dr. Caldwell's Syrup Pepsin is selling at the rate of over 6 million bottles a year.

Its great success is based on merit, on repeated buying, on one satisfied user telling another. There are thousands of homes in this country that are never without a bottle of Syrup Pepsin, and the formulator of that prescription is fortunately living to see its wonderful success.

Women, children and elderly people are especially benefited by Dr. Caldwell's Syrup Pepsin. While it is promptly effective on the most robust constitution and in the most obstinate cases, it is mild and gentle in its action and does not cause griping and strain. Containing neither opiates nor narcotics, it is safe for the tiniest baby and children like it and take it willingly.

Every drug store sells Dr. Caldwell's Syrup Pepsin. Keep a bottle in your home. Where many live someone is sure to need it quickly.

DR. W. B. CALDWELL TODAY
Born Shelbyville, Mo., March 27, 1829
Began the manufacture of his famous prescription in 1892

In spite of the fact that Dr. Caldwell's Syrup Pepsin is the largest selling liquid laxative in the world, there being over 6 million bottles sold each year, many who need its benefits have not yet used it. If you have not, send your name and address for a free trial bottle to Dr. W. B. Caldwell, 511 Washington St., Monticello, Illinois.

WATERBURY

Services as usual in the Congregational church Sunday, sermon by the pastor, Rev. Edward C. Hayes. C. C. Graves leads the Christian Endeavor meeting in the evening.

George H. Lock, pastor, presides at the Methodist Episcopal church Sunday morning and evening. The ladies' aid meets with Mrs. Holmes Wednesday afternoon.

At St. Andrew's church high mass and sermon at 10:30. Rev. Robert Devoy, rector.

At the Methodist church at the Center Sunday is "every-member-present day." Rev. J. Garfield Salts, pastor. A. F. Somerville and Miss Corina Somerville are both able to be out after their recent illness. A. H. Smith, who returned from Florida last week, is confined to the house.

Miss Margaret Keefe, a teacher in the Stowe schools, is confined to her boarding place there by illness. This evening members of the Hy-patia club will enjoy Mrs. J. W. Votey at the hospital with Mrs. E. A. Stanley.

MIDDLESEX

Malcolm, son of John Eager, is quite ill at the home of his grandparents, Mr. and Mrs. George Atkins.

Miss Dorothy Smith, who closed the winter term in the Taplin school Friday, went Monday.

Miss Bessie Stockwell, who is home from her school in Norwich for a few weeks' vacation, is suffering with sciatic rheumatism.

F. J. Eaton, who has been ill with distemper and heart trouble, is improving.

Mr. and Mrs. Eldridge Burnham were in Montpelier on business Thursday.

Waldo Miles went last week to St. Albans, where he will work for the C. V. R. as fireman.

The grammar school of the village school closes this week Friday for the spring vacation.

Mrs. Waldo Miles is in Burlington for an indefinite stay.

The funeral of the late Abner Childs, who died at the home of his daughter, Mrs. E. E. Denmore, Tuesday, was held at the Unitarian church on Friday afternoon.

UNITED STATES BLAMED

For Troubles Being Experienced in Turkey.

London, March 12.—Blame for the troubles that are being experienced in settling the Turkish problem were laid at the door of the United States by Earl Curzon, the foreign secretary, in explaining the peace conference's negotiations to the House of Lords yesterday.

The Leap to the Planet Mars.

If communication with Mars must be definitely established and a rocket shot, to that planet before Captain Claude B. Collins of the New York City air police enters the multiple-charged projectile which is to take him as a pioneer to another world, he is not likely to bid farewell to this one. The captain makes other conditions; he is to assist in devising the passenger rocket; ten prominent scientists are to agree about the success of his venture; he is to be insured for \$100,000; he is to be allowed to make a lecture tour of the country by air "to awaken America to the menace we face as a nation neglecting aeronautics." Colonel Jefferson De Mont Thompson, president of the Aero Club of America, and representatives of the press must help him in planning the adventure—the "leap" Captain Collins calls it—and in arranging his "tour of the nation."

LIEUT. COL. TOMPKINS DECORATED D. S. C.

Cross Awarded for Col. Tompkins' Exceptionally Meritorious Service on the Mexican Border.

Boston, March 12.—Lieutenant Colonel Frank Tompkins, formerly commander of the 301st infantry regiment, was decorated with a distinguished service cross yesterday by Major General Clarence R. Edwards, commander of the department of the northeast.

The cross was awarded Colonel Tompkins for exceptionally meritorious service while on duty on the Mexican border.

EAST MONTEPELIER

Mrs. J. F. Robins, who went to Barre about three weeks ago to help care for her son's family, who were ill, was taken sick and could not be moved to her home until Tuesday of this week.

It was C. M. Hamblin who was injured at the F. P. Townsend auction on March 12, and not C. M. Howland, as it appeared in print in Tuesday's items.

Mrs. George Abare took her husband to Barre on Tuesday. The bad condition of the roads prevented him from returning to his work on Sunday, as is his custom.

Harry Daniels and Hiram Sparrow were business visitors in Montpelier on Wednesday.

S. H. Lyford is on the sick list. He was taken ill Wednesday night.

J. M. Martell was a business visitor in Barre on Wednesday.

F. W. Harriman of Montpelier, on one of his professional trips, took three days to reach East Montpelier one day this week.

Henry Batchelder and children are boarding at the Wheelock house, since his housekeeper moved from the LeBaron rent to Barre.

Howard Gallison and his mother visited relatives in Barre on Wednesday.

J. F. Robins and J. C. Robins were business visitors in Plainfield Wednesday.

William L. Wheeler is sick at his home with a bad cold.

A flock of horned larks (otocoris alpestris) were seen last Friday sporting in the first rain of the winter. These are one of the earliest harbingers of spring and it is to be hoped they found a snug and safe retreat under some bizzards. These birds are seed and grain eaters, so they have little trouble in finding a variety of food even in this kind of weather. They breed in Labrador and east of Hudson bay and winter as far south as South Carolina.

FIRST AID TO GARDEN LANDS.

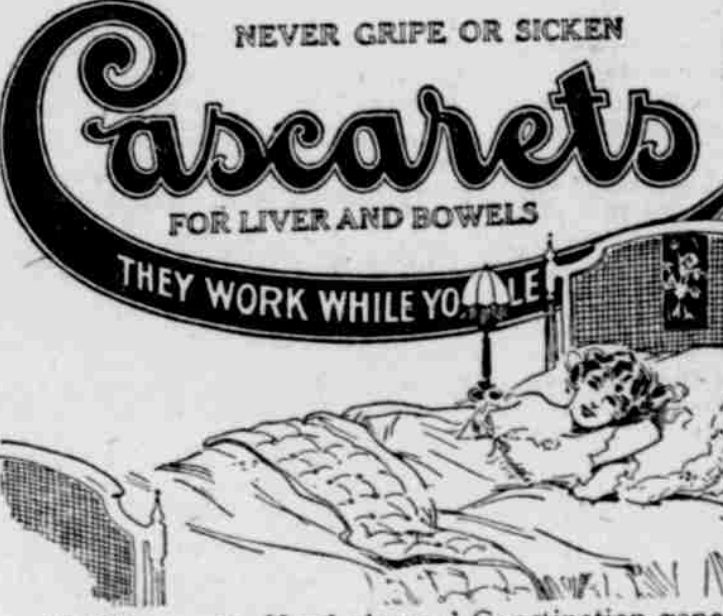

How to Get Soil in Shape for Planting in Food Crops.

If your thrift garden plot was worked as a garden last year, its preparation for this year's planting will be comparatively easy, according to United States department of agriculture specialists. First, any remains of last year's crops should be either burned or hauled away. They have a slight value as a manure, but often are carriers of disease and it is best to destroy them. The next step will be to give the land a thorough coating of manure if it can be procured. It is then ready for plowing or spading.

In case the land was not planted last year but is what might be termed new land, the first step will be to remove any weeds or trash that would interfere with plowing or spading. Sometimes the land is covered with stones or broken bricks, and these must necessarily either be hauled off or piled to one side or one end of the plot. In some cases, good substantial stone fences have been built along the sides of the plots from the stones picked from the land. In the war devastated zones of France, gardens are now growing inside the foundations of ruined houses. Every foot of ground is being utilized by these people for producing something to eat.

The third type of land that will be encountered is that which has been in sod for a number of years. Early and thorough plowing or spading is about the only method of getting this type of land into condition. Sod land is filled with the green roots of the grass growing upon it and unless these roots are thoroughly broken and started to decay, garden crops will not do well upon the land. For this reason fall plowing is advisable and if an application of manure can be made, either to be plowed under or as a top dressing after plowing, it will assist very materially in the decomposition of the roots in the soil. After this decay is partly accomplished another stirring or turning of the soil will aid materially in bringing it into the proper condition. In cold sections of the country, freezing and thawing play an important part in the preparation of this class of soil, and if the land is turned up to the elements during the autumn it will become pulverized and mellow by the time it is in shape to work in the springtime.

Where a group of gardens are being located on sod land, it is a good plan to tear up the sod by means of a disk harrow before plowing. Then, in the spring preparation of the land, the disk may again be used to advantage, cutting in both directions so as to break up the roots and other material in the soil. Splendid gardens have been grown on sod land where the proper methods of soil preparation and cultivation have been provided.
